

## **Life as a Consultant Symposium**

Friday 16 March 2018

### **Breakout session D – Abstract**

#### **Using the Three Horizons Approach to design transformative innovations in healthcare**

**Dr Margaret Hannah, Director of Public Health, NHS Fife**

Innovations can be:

- Sustaining to keep the current system going for a bit longer,
- Disruptive which open up new possibilities for future patterns of healthcare
- Transformative which aim for purposeful, intentional systemic change in line with our deepest aspirations for the future.

In this workshop, participants will be introduced to the Three Horizons approach, which has been used as a framework for engaging with change and designing options for transformation of the whole system of healthcare.

#### **Learning objectives:**

1. Become aware of different perspectives in conversations about healthcare – the managerial (First Horizon), entrepreneurial (Second Horizon) and visionary (Third Horizon)
2. Participate in exercises which explore these perspectives
3. Recognise the difference between innovations for sustaining and transforming healthcare
4. Consider how shifting from mindset to perspective can open up new ways for designing transformative innovations in healthcare.
