

Dizziness for the Physician: Syncope, Vertigo and Balance

27th and 28th September 2017, Novotel, Newcastle upon Tyne

Run over two days, the sixth running of this popular course is designed for physicians, trainees and associated health care professionals seeing the older dizzy patient in Syncope units, Falls services, TIA clinics and Outpatients. Using a varied programme of lectures, practical demonstrations, and interactive small group workshops, delegates will gain skills in assessment and management of the most common causes of syncope, dizziness and vertigo (including BPPV and repositioning manoeuvres). Course includes an understanding of gait and balance assessment, balance rehabilitation, and current developments in assessment and management of syncopal disorders from international experts.

The faculty for the course includes national and international experts and experienced teachers including Professor Sue Whitney, Professor of Balance Rehabilitation, Pittsburg, USA and consultants from the Northern Regional Syncope group.

Cost **£385** including accommodation, all meals and course fees. **£290** Non-residential rate

For more information on registering - email **Dr Joanna Lawson** Joanna.lawson@nuth.nhs.uk Telephone **0191 282 5237**

The Newcastle upon Tyne Hospitals NHS Foundation Trust, Falls and Syncope service, Royal Victoria Infirmary, Newcastle upon Tyne

RCP approved - 12 Credits External Clinical CPD

"Many thanks on running such an excellent course. As a jobbing elder care consultant, I was looking for practical tips and advice on common, difficult problems that I could use in everyday practice. This was exactly what I got, but also a wealth of well-presented material delivered by hugely credible and passionate speakers. I have already seen at least 2 patients on the acute take that I am far more confident in my diagnoses than I would have been before the course".

"I would strongly advise my colleagues in falls and syncope and trainees wishing to specialize in this field to attend"

"Excellent – packed in a huge amount of information in a short space of time. I liked the active participation encouraged by many of the speakers (without being threatening), and the practical sessions were a great way to consolidate the information from lectures. A memorable course - well done!"

"Many thanks for the incredibly good course on managing the dizzy patient. It was practical, informative and fun. I am clinical lead for our department and I have recommended that all of us should attend. It is such a common problem in our clinics and I feel more confident that I am doing the appropriate things."
