

Flagship Symposium

63rd St Andrew's Day Festival: Updates on Acute Medicine

Thursday 23 – Friday 24 November 2023

This year's flagship symposium offers a great opportunity for healthcare professionals to develop and update their knowledge across a very diverse range of topics. Bringing together many different professionals from across Scotland and beyond, the symposium encourages lively debate and discussion, and challenges delegates to consider how their medical practice might evolve.

Some of the highlights in this year's meeting include:

- The treatment of acute conditions in the medical wards and in the community
- Personal perspectives on the optimum management of common, and some less common, diseases – including illustrative case presentations
- Future therapies – medical and non-medical

All grades of medical, nursing, scientific staff, allied health professionals and medical students are most welcome.

 You can register for in-person, online or on-demand attendance

 Talks available to delegates on our **Education Portal** for 28 days post-event

Topics include:

- Encephalitis
- Malabsorption
- Cardiology
- Physician heal thyself – looking after ourselves
- Hospital at home
- Virtual clinics
- Respiratory medicine
- Infectious diseases
- The acute abdomen
- Dementia
- Hyperosmolar hyperglycaemic state
- Genetically tailored medicine
- Diabetic foot disease
- Palliative care
- Managing chronic pain
- Novel cancer drugs
